Current position

October 2023- Now: **Associate professor in biostatistics** with a shared position between

- the [Section of Biostatistics](#), University of Copenhagen (KU)
Øster Farimagsgade 5, 1014 Copenhagen, Denmark
- the [Neurobiology Research Unit](#) (NRU)
Copenhagen University Hospital, Rigshospitalet, Copenhagen, Denmark

where I do research in biostatistics along with a consulting and teaching activity in statistics. My research identifies methodological needs in medical studies, builds solutions based on mathematical and probabilistic arguments, and implements them in software available to practitioners and other statisticians. It includes the **development of multivariate models** (mixed models, latent variable models, generalized pairwise comparisons), particularly in neuroscience and clinical trials, and handling of **censored, missing, or truncated data** in longitudinal or time to event analyses.

Education and research carrier

2020 - 2023 : Assistant professor in biostatistics with a shared positive between KU and NRU
2020 - 2015 : Post-doc in biostatistics with a shared positive between KU and NRU
2012 - 2015 : Ph.D. in biostatistics, University Lyon 1, Lyon, France.
Thesis Title: [Statistical modelling for the prognosis of stroke patients](#).
2011 - 2012 : Master's degree in biostatistics ([M2 B3S](#)), University Lyon 1, Lyon, France.
2009 - 2012 : Engineering diploma from the École Centrale de Lyon, Lyon, France.
Erasmus at Politecnico di Milano (2nd semester 2011).

Teaching activity at the University of Copenhagen

[Survival analysis](#) : Master students in statistics
[Statistical analysis of repeated measurements](#) : Ph.d. students in medical sciences
[Epidemiological methods in medical research](#) : Ph.d. students in medical sciences

Grants

2017-2019: MARIE CURIE Individual Fellowships (200 000€, EU H2020-MSCA-IF-2016 746850)

2017-2020: Lundbeck Fellowships (140 000€, R231-2016-3236)

2025-2026: Savværksejer Jeppe Juhl og hustru Ovita Juhls Mindelegat (500 000 DKK)

Selected software

(packages for the **R** software)

- **LMMstar** (author and maintainer) : linear mixed model via covariance structure. Inference in small sample, test linear and non-linear combinations of parameters, pooling across models, multiple comparisons adjustment. Available on [CRAN](#) and on [Github](#).
- **riskRegression** (contributor): computation of absolute risks and average treatment effects. Methodology described in [[Brice Ozenne et al., 2017](#)] and [[Brice Ozenne et al., 2020](#)]. Available on [CRAN](#) and on [Github](#).
- **BuyseTest** (author and maintainer): implementation of generalized pairwise comparisons, including recent developments to handle right-censoring [[Brice Ozenne et al., 2021](#)]. Available on [CRAN](#) and on [Github](#).
